10 great shows from 2023 to watch on Hulu

Hulu got a big price hike this year, but it’s getting increasingly harder to cancel (at least for me) thanks to the overwhelming number of shows and movies to watch on the Disney-owned service. While those of us in the US can currently access Hulu separately from Disney Plus, things are about to change very soon.

Disney is planning to launch a combined Hulu and Disney Plus app for users who subscribe to both services, and it’s set to come out next year after some initial testing. Keep in mind that this won’t change the content available on either service, just how you access it. For now, though, here are some of the best shows released on Hulu this year.

The Bear is one of the best original series that Hulu has. It centers around Jeremy Allen White as Carmy Berzatto, an award-winning chef who’s forced to return to his hometown and take over his family’s local sandwich shop after the death of his brother. The show’s second season has Carmy’s kitchen staff taking on yet another challenge: opening up a new restaurant.

Speaking of reboots, Hulu and Disney Plus have created their own modern take on the ‘90s-era *Goosebumps* series that might’ve freaked you out as a kid. The revamped show follows a group of high schoolers who find themselves encountering supernatural happenings linked to the death of a student from their parents’ past. Unlike the older show, which has a self-contained story in each episode, Hulu’s adaptation consists of separate episodes tied to a single storyline with recognizable elements of *Goosebumps* lore sprinkled throughout.

The Other Black Girl tells the story of Nella Rogers (Sinclair Daniel), an editorial assistant at a publishing company called Wagner Books. Nella is the only Black woman who works there until the company hires Hazel-May McCall. While the two quickly become friends, things start to unravel when Nella suspects Hazel might be trying to hurt her career, and she discovers some unsettling secrets about Wagner Books.

FX’s *What We Do in the Shadows* has also returned to Hulu for a fifth season, which features even more goofy antics from the eclectic group of vampires. If you’re not familiar with the mockumentary-style show, it follows four vampire housemates: Nandor the Relentless (Kayvan Novak), Laszlo Cravensworth (Matt Berry), Nadja (Natasia Demetriou), and Colin Robinson (Mark Proksch) as they go about their daily lives among humans in Staten Island, New York.
