5 Trading Secrets That Could Mean Retiring 30 Years Early

Disclosure: Our goal is to feature products and services that we think you'll find interesting and useful. If you purchase them, Entrepreneur may get a small share of the revenue from the sale from our commerce partners.

Imagine opening your laptop for 30 minutes in the morning, spotting a perfect trading setup, and making a quick $10,000 before heading out to the beach. That's the life of some day traders, and it could be yours, too, if you learn a few basic strategies and give yourself some time to practice.

The trick isn't guessing or luck; it's knowing how to watch the news, where to spot high-probability setups, and minimizing risk to reduce your losses. There are many places to learn how to day trade, but more than 1,700 students have trusted our online bundle with five solid strategies. Right now, you can get lifelong access for $29.99 (MSRP $200).

Here's what you'll learn:

- **1. Candlestick Trading & Analysis Masterclass**: Candlestick charts are the market's language. Learn to spot doji, reversal, and continuation patterns that hint at big moves (or reversal trends) before they happen.
- **2. Chart Patterns for Day Trading & Investing**: Bull flags, head & shoulders, and ABCD setups are more than shapes; they're signals you can trade in any market, from stocks to crypto and futures.
- **3. Day Trading with Tape Reading**: Discover how Level 2 data and time & sales can show you where big players are

buying and selling so you can ride the wave, not fight it.

- **4. Fibonacci 101**: Uncover the “hidden levels” where price often reverses or accelerates, helping you plan precise entries and exits.
- **5. Volume Trading 101**: Volume reveals the strength of a move. Learn to spot breakouts, exhaustion points, and when momentum is fading.

You can practice all of these skills risk-free using a paper-trading simulator before putting real money on the line. Build confidence, refine your strategy, and step into live markets prepared.

What learners have to say

Check out this review from a verified buyer who loved the courses:

“I purchased this product not knowing what I [was] looking for, but that’s exactly what I need. I want to learn how to trade but everything out there is expensive. YouTube is too much and overrated. This course is very good value for the price. The lessons are very short but very powerful. The quizzes are very helpfull and the instructor explained very well.”

Get lifetime access to these stock trading courses for $29.99 (MSRP $200).
