

# 90% of Your Business Could Be Automated With Just These 4 Tools

Opinions expressed by Entrepreneur contributors are their own.

If you're only using AI just to write content, you're getting crushed. The real winners are automating sales, operations and marketing 24/7 – without hiring a single employee with Phase 3 AI. This isn't about saving a few hours – it's about building a revenue engine that runs itself. In this video, I'm revealing four high-leverage AI agents that are quietly transforming how smart entrepreneurs operate, automate and dominate – faster and leaner than ever before.

- **Revenue-generating AI agent:** Discover the AI sales agent that replaces your outbound team – qualifying leads, booking calls and handling follow-ups automatically. (Used by startups to replace entire sales departments).
- **Executive assistant agent:** Eliminate calendar chaos, inbox overwhelm and manual scheduling with an AI assistant that handles it all, saving hours of admin work every week and keeping your business on track.
- **Workflow and SOP agent:** Learn how to document and delegate complex workflows in minutes using a screen-recording AI tool that turns your process into step-by-step guides for your team or VA – no more micromanaging.
- **Pulse agent for marketing:** See how one free AI tool can analyze your sales data, audit your content and predict campaign performance before you launch – plus how I used it to triple my sales in under 14 days.

Whether you're a solopreneur or scaling a lean team, these AI

agents can replace repetitive work, increase your output and give you a serious competitive advantage – all while keeping your overhead low. I'll show you how each tool works and how to implement them fast, even if you're not a tech expert.
