

Amazon's big spring sale continues, and we found the 85 best deals

Just as flower buds are beginning to bloom to mark the seasonal shift toward warmer months, Amazon is hosting its first big sales event of 2025. The Big Spring Sale, as it is known, is live, and runs through Monday, March 31st, bringing with it a slew of discounts on gardening supplies, bedding, and other necessities. While the discounts aren't as steep as during tentpole events like Prime Day or even Amazon's October event, you can still find steep savings on security cameras, headphones, smartwatches, and loads of other tech.

We've dug into all the deals and discounts available so far, the best of which you'll find below. By and large, most of the deals will last until the end of the event. And, while having a Prime subscription means your packages will certainly arrive more quickly, you don't necessarily need to be a member to get in on these tried-and-tested *Verge* favorites. We'll also be keeping an eye on deals at competing retailers, including Best Buy, Walmart, and Target.

Headphone and earbud deals

Portable charger and cable deals

Speaker and soundbar deals

Tablet and e-reader deals

Smartwatch and fitness tracker deals

Update, March 26th: Updated to reflect current pricing/availability and several new deals, including those for the Meross Smart Wi-Fi Garage Door Opener and Sharge's Retractable 65 charger.
