Anker recalls its 321 Power Bank due to fire risk

Anker says it’s recalling its 321 Power Bank (PowerCore 5K, model number A1112), citing a fire risk posed by a manufacturing defect. The 321 is a compact power bank with two ports — one for USB-C and one for USB-A. Anker says “only a small number” produced after March 2023 are affected, but it’s recalling all of them anyway.

Look for “Anker 321 Power Bank (PowerCore 5K, Black), Model: A1112” in the white text printed on the bottom to see if you have this model. If you do, Anker urges you to stop using it immediately. Fill out this form, including the serial number, to stake your claim for a replacement 533 Power Bank the company is offering affected owners. Try to track down your proof of purchase before you head over there, as it says that will speed the process along.
