Apple Maps follows Google in renaming Lake Ontario

Apple Maps has officially changed the name of Lake Ontario to Lake America, as reported earlier by *Bloomberg*. The company joins Google in re-labeling the Great Lake following an executive order signed by President Donald Trump in the midst of a trade dispute with Canada.

The Canadian version of Apple Maps still shows “Lake Ontario” when panning over the area, while international versions of the app show both names, according to *Bloomberg*. Google updated its map shortly after the name change went live in the US Geographic Names Information System (GNIS), but Apple waited a bit longer.
