Asus teases a new RGB-outlined Rog Strix laptop coming next year

Though Asus doesn’t say which Rog Strix models it will introduce, leaked retail listings suggest Asus could reveal new Rog Strix 18 Scar and Rog Strix G16 laptops.

While the Rog Strix Scar 18 is rumored to come with up to an Intel Core Ultra 9 285 HX processor and Nvidia GeForce RTX 5090 graphics chip, the Rog Strix G16 could feature the same CPU options but with up to a GeForce RTX 5080, as noted by *NotebookCheck*.

Asus may have more to share than just a pair of new Rog Strix laptops at CES, which is just a couple of weeks away. Recent leaks also indicate that Asus is getting ready to reveal an upgraded Rog Flow Z13 hybrid tablet / gaming laptop equipped with AMD’s next-gen “Strix Halo” processor.
