Barbara Script Typeface for Access All Areas Members

Access All Areas members have a lovely new script font to download this week, courtesy of NREY. Barbara is a brushpen typeface with a flowing handmade style. It's a great font choice for designs that require creative lettering with a combination of subtle irregularities that give it a handwritten look, while also featuring some elegant details such as swooping ligatures and curly terminals.

Andriy Dykun is the Illustrator and font-maker known as NREY. He shares a range of typefaces in his Creative Market Store, covering a variety of type styles, including plenty of detailed blackletter and gothic display fonts.
