Bezalel Creative: Web Developer

Web Developer / Contract / Paid
Carnegie VIC AU

http://bezalelcreative.com.au/

Bezalel Creative is a small design studio based in Carnegie. We are looking to expand our team with an awesome Web Developer/SEO expert! We are a friendly team of designers, 3d renderers, web developers, photographers and more. You will be involved in the core of it all.

Role Details

We are looking for someone who will help with the design and development of websites from inception to final product.

You will be involved in planning before development including site mapping, wireframing, UX design and collaborating with fellow designers and clients.

You will need to be familiar with animation, CSS, jquery, wordpress CMS, shopify, apache, adobe suite (predominantly Adobe Xd, php code language, filezilla and hosting management including SSL certificates and setup.

Must have an understanding of responsive design for mobile and tablet friendliness and be able to integrate plugins to a website.

Familiar with SEO optimisation and Google Analytics setup and data tracking/analysis.

Responsibilities:
– Design/Develop websites (Create site maps, wireframes, UX design, coding, CMS, SEO, Google Analytics)

– Supporting clients and senior designers throughout the execution of campaigns and projects.
– Planning and preparing presentations of site mapping, wireframing and UX design.

– Communication with internal and external team members such as printers, photographers, web developers, etc.

Skill/Attributes Required

– A undergraduate/bachelor/honours degree in web development or similar.

– An excellent portfolio of your best work.

– Skills and proficiency in Adobe Creative Suite including Photoshop, Dreamweaver, Xd.

– An understanding of fundamental design principles, layout, hierarchy, usability and typography.

– A professional attitude and accountability on projects assigned, managing and meeting expected timeframe.

– Ability to think outside the box and work as part of a team.

– Knowledge of UI/UX design and design/development of responsive websites.

– High level of attention to detail

– Ability to code and understanding of HTML/PHP/CSS
