Comic Code – it’s no joke!

Life is full of surprises. For example, Comic Code, designed by award-winning type designer Toshi Omagari, is one of our recent best-sellers, and our all-time best-selling coding font family!

Many developers were curious to check out a typeface designed specially for them, but might have expected a punchline – until they began using it to code. Then they were hooked.

Here’s what some had to say about Comic Code:

“Damn never thought someone would manage to sell me a comic font.”

“I’m really excited to see my wife’s reaction when I explain that I spent $30 on a font.”

“Holy crap, I can scan read that code!”
