Control is free for one day on the Epic Games Store

The Epic Games Store is offering *Control* for free as part of its 15 days of free games promotion – the game is only available for free until December 27th at 11AM. To get the game, simply log in to the Epic Games Store (or create an account), navigate to *Control*'s game page, and then hit "Get" to add the game to your library for free.

Control was a freebie on the Epic Games Store this past June, so if you missed picking it up then, now you have another chance to grab it for free. The action-adventure game was named one of *The Verge*'s top games of 2019, and follows Jesse Faden, the Director of a secret agency called the Federal Bureau of Control, as she harnesses supernatural abilities to combat a paranormal force.

In addition to the Holiday Sale, which offers discounts on titles like *Marvel's Guardians of the Galaxy* and *Far Cry 6*, the Epic Games Store is giving every player a $10 coupon that applies to games $14.99 or above. The coupon lasts until the end of the Holiday Sale on January 6th, 2022, and there's no limit to how many games you can use it with – if you decide to fill up your cart with 10 games over $14.99, you'll get $10 off each of those games. The Epic Games Store will also be offering a free game every day until December 30th.
