Cos’è e come funziona il Deep Web

Il Deep Web è costituito da tutti i siti web ai quali non è possibile accedere tramite i motori di ricerca. La maggior parte delle persone usano i motori di ricerca per navigare su internet e per questo motivo, non incontrerà mai la rete misteriosa conosciuta come Deep Web.

WHAT IS THE
DEEP WEB?
For every site search engines index...
there are 4,000 - 5,000 pages they don't!
CRAWLERS DON'T SEE EVERYTHING
Search engines use crawlers to discover content on webpages
WHAT DO SEARCH ENGINES MISS?
CONTENTS OF SEARCHABLE DATABASES
PASSWORD PROTECTED SITES
SITES PROGRAMMED TO KEEP THEM OUT
WHAT'S ON THE DEEP WEB?
550,000,000,000 DOCUMENTS
of mostly boring stuff
PAGES PEOPLE HIDE
CHILD PORN
WEAPONS FOR SALE
CRIMINAL NETWORKS
WHERE ARE THE SEEDIEST SITES TO VISIT?
THE SILKROAD
A surprisingly legit drug market place shutdown by the FBI in 2013
DangerousDrugsForSale
98%
THE WHITE WOLVES PROGRAM
People sell criminal services
$25,000 to assasinate an AVERAGE PERSON
$15,000,000 to assasinate a CEO
THE HUMAN EXPERIMENT SITE
Records of medical experiments on kidnapped homeless people
YOUR DEEPWEB TOOLKIT
TOR
An anonymous web browser
BITCOIN
An encrypted virtual currency
THE NSA & THE DEEP WEB
The agency sets up Tor routers to TRACK TRAFFIC
Takes advantage of FLAWS IN THE BROWSER
USES ADS to track Deep Web users
DASHBURST
dashburst.com
