Prime Day is less than a week away. Amazon's semi-annual sale officially kicks off next Tuesday, July 11, and will last through July 12. If you're looking to score some of the year's best deals, next week ought to bring some good ones. But there are savings to be had in the meantime, and if you're looking to add some security cameras to your home, upgrade to a new smart countertop oven, or get a new laptop, we've found some great bargains.
