Greetings, Arsians! Courtesy of our friends at TechBargains, we have another round of deals to share. Today's list is highlighted by a deal on the 256GB variant of Samsung's EVO Select microSD card. It's down to $40 on Amazon, which is a new low and about $10-15 off its usual price.

We've highlighted this card a few times in the past, so we won't dwell on the specifics here. In short, while it's not the absolute fastest of its kind and it's not as good for security cams as a dedicated high-endurance card, it should still be plenty powerful enough to boost the storage space of a Nintendo Switch, smartphone, or GoPro. It also comes with a 10-year warranty. More importantly, it's good value for a reliable card with this much storage at this price.

If you don't need more storage, though, we also have deals on HDMI cables, *Kingdom Hearts III*, PlayStation Plus subscriptions, and much more. Have a look for yourself below.
