Greetings, Arsians! Courtesy of our friends at TechBargains, we have another round of deals to share. Today's list is headlined by a new low on the 500GB model of Samsung's 860 EVO SSD, which is currently down to $68.40 at Amazon with an on-site coupon.

It's not the pinnacle of performance at this point, but the 860 EVO is still fast enough for those looking to upgrade an aging PC saddled with an HDD or complement a device whose existing solid-state drive is running out of space. While competing SATA drives like Crucial's MX500 are currently

available for a couple dollars less, the 860 EVO is a bit faster and generally more durable, so we think it’s worth buying when the price difference is this slight.

Beyond that, we also have deals on a variety of Nintendo Switch games and accessories, Apple’s HomePod, GoPro action cameras, and more. Have a look for yourself below.
