Facebook to App and Website Developers: HTTPS by Oct. 6

Applications and websites using Facebook Login have until Oct. 6 until all Facebook Login redirects must use HTTPS and all Facebook JavaScript software-development-kit calls that return or require access tokens do so only from HTTPS pages. Software engineer Brad Hill announced in a blog post that the social network added an Enforce HTTPS setting to… https://www.adweek.com/digital/facebook-to-app-and-website-developers-https-by-oct-6/
