Felicity – A Serif Font Family for Access All Areas Members

This week Access All Areas members have a superb serif font to download, courtesy of Fenotype. Felicity is a tightly cut heavyweight display serif that comes in two weights and is packed with loads of OpenType features, such as Discretionary Ligatures, Stylistic, Titling or Swash Alternates. Felicity is also equipped with Contextual Alternates and Standard Ligatures that prevents letters from colliding.

Emil Bertell is the type designer behind Fenotype, a popular font foundry that has supplied many of the best selling typefaces over the past decade, including several of my go-to fonts in my own collection. Currently, Fenotype and Fontspring are celebrating ‘ten years of fonts’ with a Grand Sale of 65% off all Fenotype fonts released between 2010-2020. This is a great opportunity to stock up your font catalogue over the next two weeks with some of the best brush script and display fonts available.
