FUTURE STATE by Semi Permanent

Future State is a live symposium programmed by Semi Permanent, where some of the world’s sharpest companies(Google, FACEBOOK, Deus Machine, Wired, Splendour in the grass) will convene for a day of thought leadership and smart discussion. It’s a live event, a networking opportunity and a digital experience; our ideal setting to design a blueprint for the future of business (and whatever the hell comes next). And no matter your industry, company size or executive level, you won’t want to miss it.
