While profits fluctuate between different stocks and time periods, the annualized returns still tend to be higher than the average savings account or other investment options. The biggest catch, of course, is that investing in the stock market can be risky if you don't know what you're doing.

This stock screener tool and an online course on the stock market might help you make safe, profitable investments. And, with this back-to-school sale, you can get them both for life for only \$119, normally \$900.

Discover thousands of stock options in minutes.
