Halo Infinite is about to get its last major update

On November 18th, Operation: Infinite will be released for *Halo Infinite* players with a battle pass and lots of new customizations, but according to the team, that's it for this game's content updates:

> *With multiple Halo titles in development, we'll need our whole team's combined focus to deliver new experiences with the same passion and care that our community has given us. While we remain committed to supporting Halo Infinite on the road ahead, Operation: Infinite is the last major content update currently planned.*

Now, the team writes, "we've been floored by the response" to *Campaign Evolved*, which will be released on both PS5 and Xbox next year.
