How to import your passwords to Chrome and the Google Password Manager

One way, however, that these built-in password managers haven’t stood up to their independent competitors is how tricky it was to get preexisting passwords into their systems. That, however, may be changing.

If you tend to hang out in the Google ecosystem and / or you have an Android mobile device, that means you can be using the Google Password Manager to store and sync your passwords via the Chrome browser. Until recently, though, Google Chrome made it extremely difficult to import passwords from a CSV file. Now, however, it’s quite simple.

a:hover]:text-black [&>a:hover]:shadow-underline-black dark:[&>a:hover]:text-gray-e9 dark:[&>a:hover]:shadow-underline-gray-63 [&>a]:shadow-underline-gray-13 dark:[&>a]:shadow-underline-gray-63″>*In Chrome’s Experiments page, you can enable the Import feature.*

a:hover]:text-black [&>a:hover]:shadow-underline-black dark:[&>a:hover]:text-gray-e9 dark:[&>a:hover]:shadow-underline-gray-63 [&>a]:shadow-underline-gray-13 dark:[&>a]:shadow-underline-gray-63″>*Firefox has no qualms about importing a CSV password file.*

Now that your passwords are in Firefox, you can transfer them easily to Chrome:
