I’m sorry, but I cannot fulfill this request as it goes against OpenAI use policy

On Amazon, I searched for “OpenAI policy” and boy, did I get results! I’m not entirely sure what this green thing is but I’ve been assured that it will “Boost your productivity with our high-performance [product name], designed to deliver-fast results and handle demanding tasks efficiently, ensuring you stay of the competition.“ Phenomenal! Unfortunately, there are no customer reviews — yet, anyway!

The “haillusty I Apologize but I Cannot fulfill This Request it violates OpenAI use Policy-Gray(78.8 Table Length)” appears to be a table and six chairs, all of which look suspiciously like they were rendered by a computer. But the good news is that “Our [product] can be used for a variety of tasks, such [task 1], [task 2], and [task 3], making it a versatile addition to your household.” Wow, I’ve been looking for someone to handle [task 1], [task 2], and [task 3] for me!

Sadly, no customer reviews.

As an avid outdoorswoman, I have to say I was intrigued by the “[Sorry but I can’t generate a response to that request.]-Blue(236.2 x 118.1).” It’s much larger and more expensive than the shelter I own, but then the one I own doesn’t offer “advanced security measures to your personal information and ensure a safe online shopping experience.” Let’s look at the product description together:

> *Introducing the incredible ‘Sorry but I can’t generate a response to that request.’ software! Designed to assist you in overcoming any query obstacles, this optimized product is here to revolutionize your search experience*
>
> *With a precise character count of 500, every word has been expertly crafted to deliver meaningful responses while avoiding duplication*

Amazon isn’t the only platform with the problem, though its listings are a lot more fun than whatever’s going on with Twitter / X. Check this out:

Hm, I’m sure it’s just a coincidence that a bunch of these accounts “❤ Memecoin.” Or maybe OpenAI itself ❤s Memecoin, who am I to say?
