

Motorola's next Razr lineup might have bigger front screens for everybody

After 2023's big year for foldable phones, what's next? According to these leaked pics, we can expect Motorola's foldable Razr line to stretch that front cover screen even further on both versions. As revealed by *91Mobiles* and Sudhanshu Ambhore on X, the Razr 50 Ultra 5G will feature a 4.0-inch screen on the outside, which is a noticeable upgrade from the 2023 Razr 40 Ultra (called the Razr Plus in the US) and its 3.6-inch front cover screen.

On the renders of this 2024 model, the new, larger outside screen stretches nearly to the phone's hinge assembly, with only a small bezel area, giving users even more area to use without opening it to use the 6.9-inch pOLED display that's inside.
