My favorite Nintendo Switch 2 accessories are heavily discounted for Black Friday

The $449 Nintendo Switch 2 is one of the hottest holiday gifts, so it’s no surprise that you won’t find any discounts on the console, which was released in June and has already amassed a library of must-play games. However, the next best thing – discounts on accessories that we recommend – is in full swing during Black Friday. Whether you’re getting or giving a Switch 2, add-ons that will protect or enhance the console are cheaper than usual.

I’ve reviewed numerous screen protectors, cases, controllers, and other accessories made for the Switch 2, and the ones I think are best (and that have the best discounts) get VIP placement below. I’ve also included other Switch 2 accessories that shoppers will like.
