My Top 10 Most Popular Video Tutorials from 2018

2019 is just around the corner, so it's that time of year when I look back at the last 12 months of uploads to my Spoon Graphics YouTube Channel and share my top 10 most popular video tutorials from 2018. Channel stats on the whole are down slightly from last year, by between 15-30% in Views and Subscriber growth. This time last year I'd just about reached 200,000 subscribers, and almost a year on I'm almost at 250,000. It's not quite the explosion from 100,000-200,000 in 2017, but it's nice to know my channel is still steadily growing. Here's an overview of my best performing uploads. Which ones were your favourite?
