Tesla presented the images of the redesign of the **Model S Plaid** , one of its electric cars, and **Elon Musk** did not hesitate to tweet about it. The tycoon explained that the car can be purchased from February.

The founder of the automotive company commented that this is the first car produced that reaches 60 mph (almost 100 km / h) in less than two seconds. On the company page they specify that the car will be able to reach 100 km / h in 2.1 seconds and its maximum speed is 322 km / h.

> *0 to 155mph trap speed in a 1/4 mile. 200mph top speed (with right tires).*

Those who decide to buy the car will also be able to play video games and will have a central cinematic 17-inch screen with a resolution of 2,200 x 1,300 pixels that can be tilted from left to right.

“Up to 10 teraflops of processing power enables in-car gaming on par with the newest consoles available today. The compatibility with the wireless controller allows you to play from any seat ”, it is explained on the page.
