Project Spotlight: Scott Sheldon

Web and Infographics Design for Scott Sheldon

We are excited to share the work we completed for Scott Sheldon, nationally recognized supply chain consultants based out of Detroit, Michigan.

Scott Sheldon’s new website needed to convey the level of sophistication and technical know-how they bring to each and every one of their clients. In conjunction with upgrading to our web platform, Go Media developed intuitive infographics to help deliver technical information with ease.

Here are a few previews of the work we did. To view the full project, head here.
