Quick fix: what are those circles on my Chrome tabs?

You may have noticed recently that of the tabs on your Chrome browser have circles around the tab’s icon and that the icon itself is smaller and slightly faded. What’s that all about — and can I change them back?

a:hover]:text-black [&>a:hover]:shadow-underline-black dark:[&>a:hover]:text-gray-e9 dark:[&>a:hover]:shadow-underline-gray-63 [&>a]:shadow-underline-gray-13 dark:[&>a]:shadow-underline-gray-63″>*You can disable Memory Saver or list specific sites that will always be active.*

If you find that irritating, you can turn Memory Saver off by simply going to the three-dot menu icon in Chrome’s upper right corner and going to **Settings > Performance > Memory Saver**. You can either toggle it off completely or keep it on and create a list of sites that you want to be always active.

Incidentally, this feature is something that another major Chromium-based browser, Microsoft Edge, has had for a while. If you’re an Edge user, you can go to **Settings > System and performance**, and in the section called **Optimize Performance**, you can toggle on or off the ability to put inactive tabs “to sleep,” to fade those sleeping tabs, and to choose which sites should remain active.
