RSA Conference 2023 – Announcements Summary (Day 3)

Hundreds of companies are showcasing their products and services this week at the 2023 edition of the RSA Conference in San Francisco.

To help cut through the clutter, the *SecurityWeek* team is publishing a daily digest summarizing some of the announcements made by vendors.

RSA Conference 2023 – Announcements Summary (Day 1)

RSA Conference 2023 – Announcements Summary (Day 2)

Here is a roundup of some of the most important new product and service announcements made on the third day, as well as news that we missed from the previous days:

Bishop Fox announces UK expansion

Bishop Fox has announced its expansion into the UK market. The company's expansion strategy has an initial focus on Northern Europe.

BigID and Thales offer integrated solution

BigID and Thales have teamed up to offer an integrated solution that combines BigID's Data Intelligence with Thales'

CipherTrust Platform to deliver comprehensive data protection and privacy compliance by proactively encrypting, anonymizing, and deleting data accurately, and at scale.

Checkmarx publishes Global Pulse on Application Security study

Checkmarx has published the results of its Global Pulse on Application Security study, which found that 88% of AppSec managers experienced at least one breach in the prior year as a direct result of vulnerable application code.

Graylog announces new features

SIEM and log management firm Graylog has announced a new version of its platform to simplify incident investigations, optimize threat detection and response, and reduce unnecessary data storage costs. Version 5.1 is currently in Beta and is expected to become generally available in May.

Gurucul extends capabilities of Security Analytics and Operations Platform

SIEM firm Gurucul is extending the capabilities of its Security Analytics and Operations Platform. The company has improved search functionality, identity-based detection and response, and cloud observability.

(ISC)² releases cybersecurity policy research

Nonprofit cybersecurity organization (ISC)² has released a new report titled ‘Global Approaches to Cyber Policy, Legislation and Regulation’, which analyzes approaches to cyber legislation and regulation in Canada, the EU, Japan, Singapore, the United Kingdom and the United States.

ManageEngine launches MSSP Edition of cloud-hosted SIEM solution

ManageEngine announced the launch of the MSSP Edition of its

cloud-based SIEM solution, Log360 Cloud.

Mira Security announces virtual Encrypted Traffic Orchestration (vETO) product

Mira Security has announced its virtual Encrypted Traffic Orchestration (vETO) product for public cloud, which will soon be available for purchase in the AWS Marketplace. The Cloud vETO provides secure visibility into encrypted traffic.

SaaS Alerts launches new solution

SaaS Alerts, a cybersecurity company that enables MSPs to protect and monetize customer SaaS business applications, has launched Unify, a new solution designed to provide visibility between SaaS apps and end-user devices using remote monitoring and management (RMM) agents.

Saviynt launches solution marketplace

Saviynt has launched Saviynt Solution Exchange, a marketplace of applications built on the company's Enterprise Identity Cloud (EIC) by major organizations such as Deloitte, EY, IBM, KPMG, CredenceIA, Inspira Enterprise, Oxford Computer Group, ServiceNow, Microsoft, Ping Identity, Zscaler, and 1Kosmos.

Skyhigh Security adds new capabilities to Security Service Edge

Cloud security firm Skyhigh Security has announced the addition of several new capabilities to its Security Service Edge (SSE) product portfolio, including Exact Data Match (EDM) for sensitive data protection, unified data protection for Microsoft 365, Remote Browser Isolation (RBI) to CASB and ZTNA, and a new policy builder.

Tessian launches new email threat response capabilities

Email security firm Tessia has announced the general availability of Tessian Respond, which enables security teams

to quickly identify and respond to all email threats by offering proactive threat hunting capabilities and enabling response and remediation for end-user reported emails.

Traceable AI introduces Zero Trust API Access solution

Traceable AI announced the launch of Zero Trust API Access (ZTAA), a solution designed to help organizations better protect sensitive data and stop API abuse. The solution provides dynamic data access policy, continuous adaptive trust, and intelligent rate limiting capabilities.

Uptycs launches cloud security early warning system

Uptycs has unveiled new capabilities for its CNAPP and XDR platform, enabling organizations to collect and analyze GitHub audit logs and user identity information from Okta and Azure AD to reveal suspicious behavior, creating an early warning system that allows security teams to identify and stop threat actors before they can access data and services in the cloud.

Announcements were also made at the 2023 RSA Conference by CybeReady, Cybereason, Evolution Equity Partners, HashiCorp and Microsoft, Infoblox, Thales, and Xcitium.
