

Secretlab Skins let you customize your gaming chair

Secretlabs, a company that's become synonymous with gaming chairs, is finally giving us a better way to keep your seat clean. Secretlab Skins are available to purchase now directly through Secretlabs and allow you to finally wash off the sweat stains in your gaming chair, you filthy try-hard.

Essentially slipcovers for Secretlabs' Titan Evo 2022 gaming chair, Secretlab Skins give you a quick and easy option not just for keeping your chair clean but also swapping out its aesthetic. Made from the same SoftWeave fabric used on its gaming chairs, the Skins are all machine washable and are available in seven colorways at launch, in addition to several branded designs as well. Each Secretlab Skin is priced at \$169, and more designs will be available post-launch.

With the Titan Evo 2022, Secretlabs introduced some interesting new ways to easily customize the look and feel of your gaming chair with its swappable magnetic armrests, headrests, and lumbar pillows that allow you to give your gaming chair a fresh new look.

In addition to their customizability, one of the coolest things about Secretlabs chairs is the number of branding tie-ins they've managed to acquire, giving them the rights to produce chairs mirroring the aesthetics of DC superheroes, *Game of Thrones*, *The Witcher* series, and even *DOTA* and *League of Legends* characters.
