

Sinners is getting an IMAX re-release

If you're rushing to see *Sinners* in IMAX, you'll have a bit more time. Today, Warner Bros. has announced Ryan Coogler's sexy and soulful vampire thriller will get a 70mm IMAX re-release at select locations around the world.

"Audiences have spoken and we listened," said Jeff Goldstein, Warner Bros. president of global distribution in a statement to *Variety*. "We wanted to give everyone the opportunity to see it – or see it again – in 70mm IMAX."

The movie was set to leave IMAX screens to make room for Marvel's *Thunderbolts**. On social media, theatergoers posted about going to see *Sinners* in IMAX on off hours only to find packed or very nearly packed showings and would compare them to considerably less packed primetime showings of *Thunderbolts**.

The re-release of *Sinners* in 70mm IMAX will begin May 15th and run through May 21st. But if you're like me and don't live anywhere near an IMAX showing, you can still have a pretty good time seeing *Sinners* in standard definition.
