Steam Deck, ROG Ally, and more: all the news about the handheld PC gaming revolution

In July 2021, Valve revealed the Steam Deck, a Switch-like handheld device packed with features including a huge variety of control options, a 7-inch touchscreen, the ability to connect to external displays, and a quick suspend / resume feature. The device began shipping in February 2022, starting at $399.

We’ve been keeping a close eye on the Steam Deck and rivals, and you can read all of our coverage here.
