

Sundance 2025: all the latest movie reviews and updates from the festival

A new year means a new Sundance Film Festival, and a fresh crop of promising original features that could go on to become awards season darlings in a few months. It might be hard to top last year's festival where *Didi*, *A Different Man*, and *I Saw the TV Glow* all made strong showings. But with films like *Atropia*, *Bubble & Squeak*, and *Didn't Die* on the roster, this year's Sundance might just do the trick.

Naturally, *The Verge* is going to be taking in as much of Sundance as we can and posting bite-sized reviews of everything we see. We'll also be posting longer reviews and sharing trailers, and you can follow along here to keep up with all of the news out of the festival.
