

The 12 best TV deals you can grab ahead of Black Friday

Black Friday wouldn't be Black Friday without a deluge of TV deals. And while we wouldn't exactly recommend the second-rate models lining the Sunday circulars, there are plenty of TVs already on offer for Black Friday that deliver a satisfying viewing experience and solid feature set – whether you plan on gaming, watching sports, or catching up on the latest TV shows and movies.

Several of the best OLED models are currently sitting at or near all-time low prices right now, including the excellent LG C4 and Sony A95L QD-OLED, the latter of which a panel of judges (including our own Nilay Patel) voted as the veritable “King of TV.” Below, we're also highlighting briefcase TVs, solid midrange picks under \$1,000 like the 65-inch TCL QM85 (which has tons of features for the price), and even dirt-cheap sets – including a \$70 32-inch Insignia TV that would work just fine for a garage or kitchen.
