

The best Apple deals you can get during Prime Day

Amazon's Prime Day sale is here, and whether you're looking for a new pair of wireless earbuds or a smartwatch, there's a good chance you'll find a discount. The Apple Watch Series 11 has already dropped to a new low price, while the AirPods Pro 3 recently hit a record-low \$169 at Walmart. That particular deal has sold out, but the earbuds remain discounted to \$179, and the lower price could return given how volatile the sale has been.

For now, the below are the best Apple deals currently available. Some are exclusive to Prime Day, while others are simply great discounts we think are worth highlighting. We'll continue updating this guide throughout Prime Day, highlighting more deals as they become available.

Earbud and headphone deals

Update, June 23rd: Adjusted prices and availability and added new deals on the Apple Magic Mouse and Apple Pencil (USB-C).
