

The best early Black Friday deals you can already get

Want to get a head start on your holiday shopping before the Black Friday madness officially begins on Friday? Despite the fact the annual shopping holiday is still a few days away, many major retailers are already offering a number of early Black Friday sales, making the days leading up to the shopping event an ideal time to avoid the rush.

While it's possible prices will dip even lower once the big day arrives, the discounts we're currently seeing are nothing to scoff at. Target, Best Buy, and Walmart are offering some seriously steep discounts on a number of popular tech and gadgets, ranging from Apple devices to TVs, tablets, smart displays, and more.

To make your life a little easier, we've curated a list of some of the best deals available so far. These are the cream of the crop, but they're far from being the only discounts available. For even more deals, be sure to also check out our retailer-specific Black Friday roundups for Best Buy, Target, and Walmart, which we'll continue to update throughout the month alongside this post and the rest of our Black Friday content.
