The best iPhones

Picking a new iPhone feels like it should be simple. But like so many other modern problems (have you tried simply *choosing something to watch on TV lately* — an impossible task) it's a little more complicated than it seems. Counting previous models that are still hanging around, along with all the Pros and Pluses and Maxes, Apple currently sells *eight* different iPhone models on its website. Eight! It's almost as confusing as trying to buy an iPad.

But fear not; there's help. After plenty of thorough testing, day-to-day use, and many blue chat bubbles, I'm here to help you navigate Apple's extensive product catalog. Whether you want an iPhone that will get through two days on a single battery charge, one that truly fits in your pocket, or the least expensive iPhone you can buy, we've got recommendations.
