

The FCC has finally decreed that 25Mbps and 3Mbps are not 'broadband' speed

Fixed terrestrial broadband service (excluding satellite) has not been physically deployed to approximately 24 million Americans, including almost 28% of Americans in rural areas, and more than 23% of people living on Tribal lands

Mobile 5G-NR coverage has not been physically deployed at minimum speeds of 35/3 Mbps to roughly 9% of all Americans, to almost 36% of Americans in rural areas, and to more than 20% of people living on Tribal lands

45 million Americans lack access to both 100/20 Mbps fixed service and 35/3 Mbps mobile 5G-NR service

Based on the new 1 Gbps per 1,000 students and staff short-term benchmark for schools and classrooms, 74% of school districts meet this goal
