The Top 7 Hoodie Mockup Template Packs

The Best Hoodie Mockup Templates on the Market

The Arsenal remains committed to providing designers of all stripes with world-class tools to present their work in the best way possible. So in this installment of Arsenal insights we're going to cut through the clutter and call out the 7 best hoodie mockup templates currently making waves in the Apparel industry. Check it out!

1. Advanced Hoodie Mockup Template Pack

We had to put this one at the top of the list, not only because it has all the standard bells and whistles you've come to expect from the Arsenal (multiple ghosted [front, back, and side] and flat options, plus numerous preset options), but also because it has the unique distinction of allowing you to simulate various intricate textures that are otherwise hard to authentically recreate like Houndstooth, Herringbone, & Zebra Print! That's certainly enough to earn it a place on the list. But this one also goes above and beyond with 10 unique Zip Hoodie option, 93 Tiling Patterns, 7 Print Zones (not bad), Easy-to-use clipping masks, and 8 Present Colors for each Hoodie.

2. Classic Tri-Blend Pullover Hoodie Mockup Pack

Our choice for Number Two makes the list because it has a bit of stealth AND a touch of class. First, the Classic Tre-Blend Pullover Hoodie Mockup Pack allows users the ability to change hoodies to any color of the rainbow and beyond – that's the stealth part. But it also allows users to present their work to clients so effectively in eye-catching 3-D that the extra burden of pricey printer bills is no longer an issue. Up the ante!
