The Verge Black Friday 2021 Lightning Deal Live blog

After weeks of tracking early deals, Black Friday is finally upon us. The deals team at *The Verge* has been working tirelessly to find you the best sales from across the tech landscape, whether they're happening at retailers like Best Buy and Target or in the product categories we know our fellow gadget nerds crave most. And now that the big day is here, we have something special planned for you.

All of our writers working the deals beat this year are here to keep you up to speed throughout the shopping event, with a dedicated liveblog covering the latest Lightning Deals from Amazon as they happen. We'll also highlight some of the better, non-Lightning Deals and let you know when we update some of our bigger deal roundups, like our guides to the best phone deals and best laptop deals. So keep an eye on this space to stay in the know and save yourself some money during this sacred commercial holiday.
