

This Grad Student Is Changing the Way Chemists Clean Their Flasks

Opinions expressed by *Entrepreneur* contributors are their own.

Marc Randolph gives Ivana Korankyi advice on moving forward with her invention Flasky, a specialized round-bottom-flask scraper that saves chemists time and materials when cleaning their round-bottom-flasks.

- Marc encourages Ivana to determine the necessity of moving forward with a \$10,000 HDPE medical-grade certified mold for her invention.
- Together they discuss the pros and cons of purchasing a mold versus other methods of production and Ivana's next steps.
