Twitter Brings Drafts, Scheduling Tweets to Twitter.com

|
3 hours ago

Drafts created on desktop will only be accessible via desktop
Twitter added the ability to save tweets as drafts and to schedule tweets to Twitter.com.

The social network revealed the new features in a Twitter Support tweet, cautioning in the comments that drafts will not work cross-platform: Drafts created on desktop will only be accessible via desktop, and those created on mobile will only be accessible via mobile.
