Twitter Replaces URLs With Images When Lists Are Shared

|
8 hours ago
Tweets with shared lists will begin looking a lot better starting Wednesday, at least on iOS and Android.

Twitter said in a tweet that when users share lists, those tweets will contain images, instead of often-unwieldly URLs.

> *Long URLs, no longer. Starting today, when you share a list on Twitter, it'll have an image instead of a URL on iOS and Android. Here's ours. Your turn.https://t.co/W7dxU8ZOiP*
