

Wave. Particle. Duplex by Studio Swine

17 January–10 February 2019

29 Norman Avenue, Brooklyn, New York 11222

New York

The Wave. Particle. Duplex installation opens on 17 January and will introduce new works by Studio Swine (Super Wide Interdisciplinary New Explorers) as part of their tenure as designers in residence at A/D/O. The creative hub was created by MINI as a way of bringing people together from different backgrounds with the common interest of investigating the

future of design.

The art collective was established in 2011 and their work explores sculpture, installations, cinema, and poetry by creating immersive experiences. The exhibition and film will use technology and ephemeral materials such as plasma, fog, and light.
