Webinar Tomorrow: Understanding Hidden Third-Party Identity Access Risks

Live Webinar – Tuesday, March 28th at 1PM ET – Register to Attend

Join SecurityWeek and Saviynt for a live webinar on March 28th as we delve into the topic of **Hidden Third-Party Identity Access Risks** and explore the potential security threats that can arise when third parties are granted access to an organization’s sensitive data or systems.

Join the discussion as we address the various types of risks that organizations may face, such as unauthorized access, data breaches, and the manipulation or theft of sensitive information, and cover best practices for managing these risks, including how to:

- Conduct thorough background checks on third-party vendors
- Implement strict access controls, and regularly monitor and audit third-party access.
- Manage these risks and address the importance of having clear policies and incident response plans in place.

Register now to learn how you can better protect your organization’s sensitive data and maintain the trust of your customers, partners, and other stakeholders.
