# What to expect from Google’s Pixel 9 event

Google’s earlier-than-expected Pixel hardware event is just around the corner — it’s scheduled for Tuesday, August 13th. Thanks to the relentless flow of leaks that have emerged over the past few weeks, we have a pretty good idea of what to expect.

Google has already confirmed that it’s launching the Pixel 9 and the Pixel 9 Pro Fold, but the company may have some other surprises in store, including the Buds Pro 2 and maybe even the Pixel Watch 3.

Here’s a roundup of everything we know so far.

**a:hover]:text-black [&>a:hover]:shadow-underline-black dark:[&>a:hover]:text-gray-e9 dark:[&>a:hover]:shadow-underline-gray-63 [&>a]:shadow-underline-gray-13 dark:[&>a]:shadow-underline-gray-63″>*This leaked specs sheet reveals an ‘XL’ Pixel 9 Pro.***

## *Pixel 9 Pro Fold gets taller and slimmer*

Those three phones aren’t the only ones Google is planning to release this summer. It’s also getting ready to release its next-gen foldable, now called the Pixel 9 Pro Fold.

When compared to last year’s device, the Pixel 9 Pro Fold appears to be taller and slimmer. That design change is also reflected in the squircle-shaped camera housing on the rear of the device, which now comes with two sets of cameras.

In terms of specs, the Pixel 9 Pro Fold is rumored to come with a 6.3-inch cover display and an 8-inch inner screen. That’s larger than the original Pixel Fold’s 5.8-inch outer display and 7.6-inch inner display. The leaked specs sheet indicates that the Pixel 9 Pro Fold will come with the same G4 Tensor chip as the other devices in the lineup, as well as 16GB of RAM.

It may also have a 10MP front-facing camera, with a 48MP main camera, a 10.5MP ultrawide lens, and a 10.8MP telephoto sensor on the back of the phone. The Pixel Fold is expected to be available in porcelain and obsidian.

## *a:hover]:text-black [&>a:hover]:shadow-underline-black dark:[&>a:hover]:text-gray-e9 dark:[&>a:hover]:shadow-underline-gray-63 [&>a]:shadow-underline-gray-13 dark:[&>a]:shadow-underline-gray-63″>This feature appears to use AI to completely transform the background of a photo.*

## *a:hover]:shadow-highlight-franklin dark:[&>a:hover]:shadow-highlight-franklin [&>a]:shadow-underline-black dark:[&>a]:shadow-underline-white”>The Pixel Buds Pro 2 brings back the wing tip*

It’s already been two years since the launch of the original Pixel Buds Pro 2, and now it looks like Google is planning to give them a refresh. Leaked images from OnLeaks show the Pixel Buds Pro 2 with a small wing tip that sticks out from the side of each bud — sort of like a smaller version of the “stabilizer arc” on the original Pixel Buds.

Other small changes include larger grills that match the colors of the bud, as well as a charging case that appears to come with a small speaker (maybe to emit a noise when using Google’s Find My feature?). The Pixel Buds Pro 2 are expected to come in gray, white, green, and pink.

We may have a good idea of what the Pixel Buds Pro 2 will look like, but we don’t know much about the specs. A regulatory listing spotted earlier this year suggests the case may come with a larger 650mAh battery. Other than that, we can likely expect the Pixel Buds Pro 2 to feature the same active noise

cancellation and multipoint features as their predecessor.

## *a:hover]:shadow-highlight-franklin dark:[&>a:hover]:shadow-highlight-franklin [&>a]:shadow-underline-black dark:[&>a]:shadow-underline-white”>Anything else?*

It may seem like we already know all we know about Google’s upcoming hardware event, but the company may still surprise us. For one, there’s a possibility that we may get a look at the new “Google TV Streamer,” which *9to5Google* published leaked images of in July. It looks *way* different than the Chromecast, but we still don’t have any details on specs.

That’s all we know for now, but there’s still time between now and Google’s August 13th event, which means there’s still a chance for more leaks.

***Update, July 31st:*** *Added more rumored specs for the Pixel 9.*
