Which are the five best e-motorbikes in the US market?

Which are the five best electric motorcycles for the U.S. market ?

In this short article we want to try to give an answer to motorcycle enthusiasts who want to enter the new world of electric mobility.

First we provide a summary table and then a description of each motorcycle. There are some very interesting proposals.

Name	Price	Autonomy	Speed
Cake Kalk&	$14,000	53 miles	56 mph |
Zero SR/F	$19,495	199 miles	124 mph
Harley-Davidson LiveWire	$29,799	146 miles	110 mph
Energica Ego	$34,000	124 miles	149 mph
Lightning LS-218	$38,888	100 miles	218 mph

Now we will explain our choices, in a concise, but clear, way:

- **Cake Kalk&:** This is the cheapest and the lightest e-motorbike on the list, weighing only 174 lbs. It is designed for off-road use, with a minimalist and eco-friendly design. It has a simple and intuitive interface, with three riding modes: explore, excite and excel. It has a removable battery that can be charged in two hours. It is ideal for those who love adventure and nature, and who want a fun and agile e-motorbike.
- **Zero SR/F**: This is the most versatile and smart e-motorbike on the list, with a high-performance and fast-charging battery. It has a powerful and smooth motor, with four riding modes: street, sport, eco and rain. It

has a smart dashboard that connects to your smartphone and allows you to customize your ride settings. It also has a range of accessories and options, such as heated grips, windscreen and storage bags. It is ideal for those who want a reliable and comfortable e-motorbike for everyday use.

- **Harley-Davidson LiveWire:** This is the first e-motorbike from the iconic American brand, with a sleek and sporty design. It has a responsive and thrilling motor, with seven riding modes: road, rain, sport, range, custom 1, custom 2 and custom 3. It has a touchscreen display and a Bluetooth connectivity, that let you access navigation, music and calls. It also has a range of safety features, such as anti-lock brakes, traction control and cornering enhanced braking. It is ideal for those who want a stylish and exciting e-motorbike from a legendary brand.
- **Energica Ego**: This is an Italian e-motorbike that combines style and speed, with a carbon fiber body and an advanced suspension system. It has a powerful and aggressive motor, with four riding modes: urban, eco, rain and sport. It has a digital dashboard and a GPS tracker, that let you monitor your performance and location. It also has a regenerative braking system, that recovers energy and extends the range. It is ideal for those who want a fast and furious e-motorbike for racing or cruising.
- **Lightning LS-218**: This is the fastest e-motorbike in the world, with a record speed of 218 mph. It has a massive and impressive motor, with three riding modes: sport, race and custom. It has a touchscreen display and a data logger, that let you record your speed, acceleration and lap times. It also has an aerodynamic design and an adjustable seat height. It is ideal for those who want an extreme and exhilarating e-motorbike for breaking

records or challenging limits.
