

Wordle has achievements now

Want to flex your *Wordle* habit beyond just keeping your streak? *The New York Times* has added badges to recognize certain achievements in *Wordle*, *Spelling Bee*, and *Connections*.

“Have you achieved the infamous *Wordle* in 1? What about the Perfect *Connections* Puzzle? How many Pangrams are under your Spelling Bee belt? Badges are rewards you can earn through gameplay that let you look back on the moments that made your *NYT* Games journey special,” according to the *NYT*. In the app, you can even see your badges in “your very own trophy case.”

The *NYT* says there will also be “seasonal events and special challenges,” like badges that celebrate “special holidays or special puzzles,” and if you have an *NYT* Games subscription, you’ll be able to access some exclusive badges.

Right now, the badges are “currently” only available for *Wordle*, *Spelling Bee*, and *Connections*, but you can “look forward to more Badges coming across *NYT* Games.”
