

You can run Doom on this \$666 collector's edition box

The *Doom* plus *Doom II* Will It Run Edition, available in Switch, Xbox, PS5, and PC versions, will be available for preorder starting on Friday, April 18th, 2025 at 10:00AM ET. It's being limited to just 666 units, naturally, at a price of \$666.66. When asked if the steep but fitting price tag would be affected by tariffs, Alex Verrey, an LRG spokesperson, told *The Verge* in an email that "I do not believe there are any plans at this time to change the pricing due to tariffs."

Although a \$29.99 Standard Edition and a \$99.99 Big Box Edition will also be available, the Will It Run Edition includes an assortment of extra games, levels, gameplay upgrades, and add-ons that could justify the expensive collection for *Doom*'s biggest fans. But it's the other accessories that will be its biggest selling point.

In addition to the *Doom*-playing box, the Will It Run Edition includes four hours of the game's soundtrack on four cassette tapes (despite audio CDs existing long before the original *Doom* launched), a three-inch Cacodemon figurine that floats atop a magnetic base, and a pack of random trading cards. But the pièce de résistance is a *Doom*-playing handheld shaped like a Cacodemon with several of its teeth doubling as controller buttons. Let's hope LRG decides to sell that on its own one day.

On the games side of things, the Will It Run Edition includes *Doom*, *Doom II*, *TNT: Evilution*, *The Plutonia Experiment*, *Master Levels for Doom II*, *No Rest for the Living*, *Sigil* and *Sigil II*, a new Deathmatch pack with 25 maps, and *Legacy of Rust* which was released just last year. The games also feature

enhancements such as alternate soundtracks, upgraded visuals, modern controller support with gyroscopic aiming, new accessibility options, and eight new translations including Korean, simplified and traditional Chinese, Portuguese, and Polish.
